

"Is Your Sector Hot... Or, Not?"

BY RUSS SCHMIDT
CHART WEALTH

With the introduction of exchange traded funds (ETFs), it's now easier than ever to be **trading in the "right" stock sector**... increasing your potential for profits.

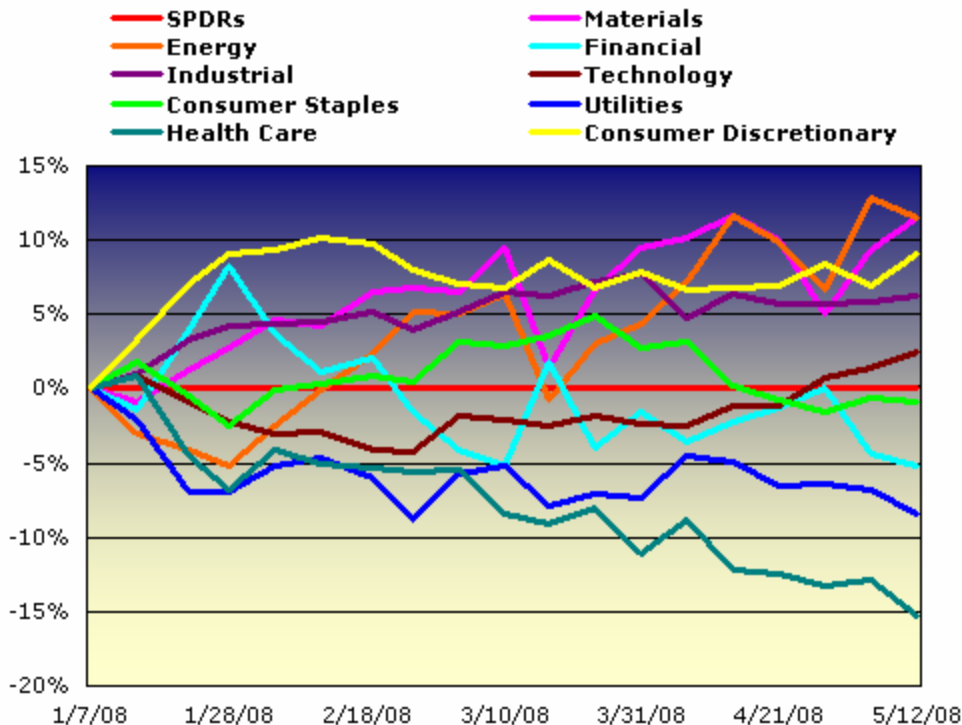

The **Select Sector SPDRs** are a group of ETFs derived from the component stocks of the **Standard & Poor's 500 Index**.

Use the [relative performance](#) method to narrow the field to a few strong performing sectors.

For example, the **Energy Sector** currently leads all other sectors and is **out-performing the S&P 500** (represented by SPDRs) by **11.56%**.

Now, you know which sector is **hot...** and, you **narrowed the field from 500 stocks to 36 stocks!**
